

WAKEY WAKEY

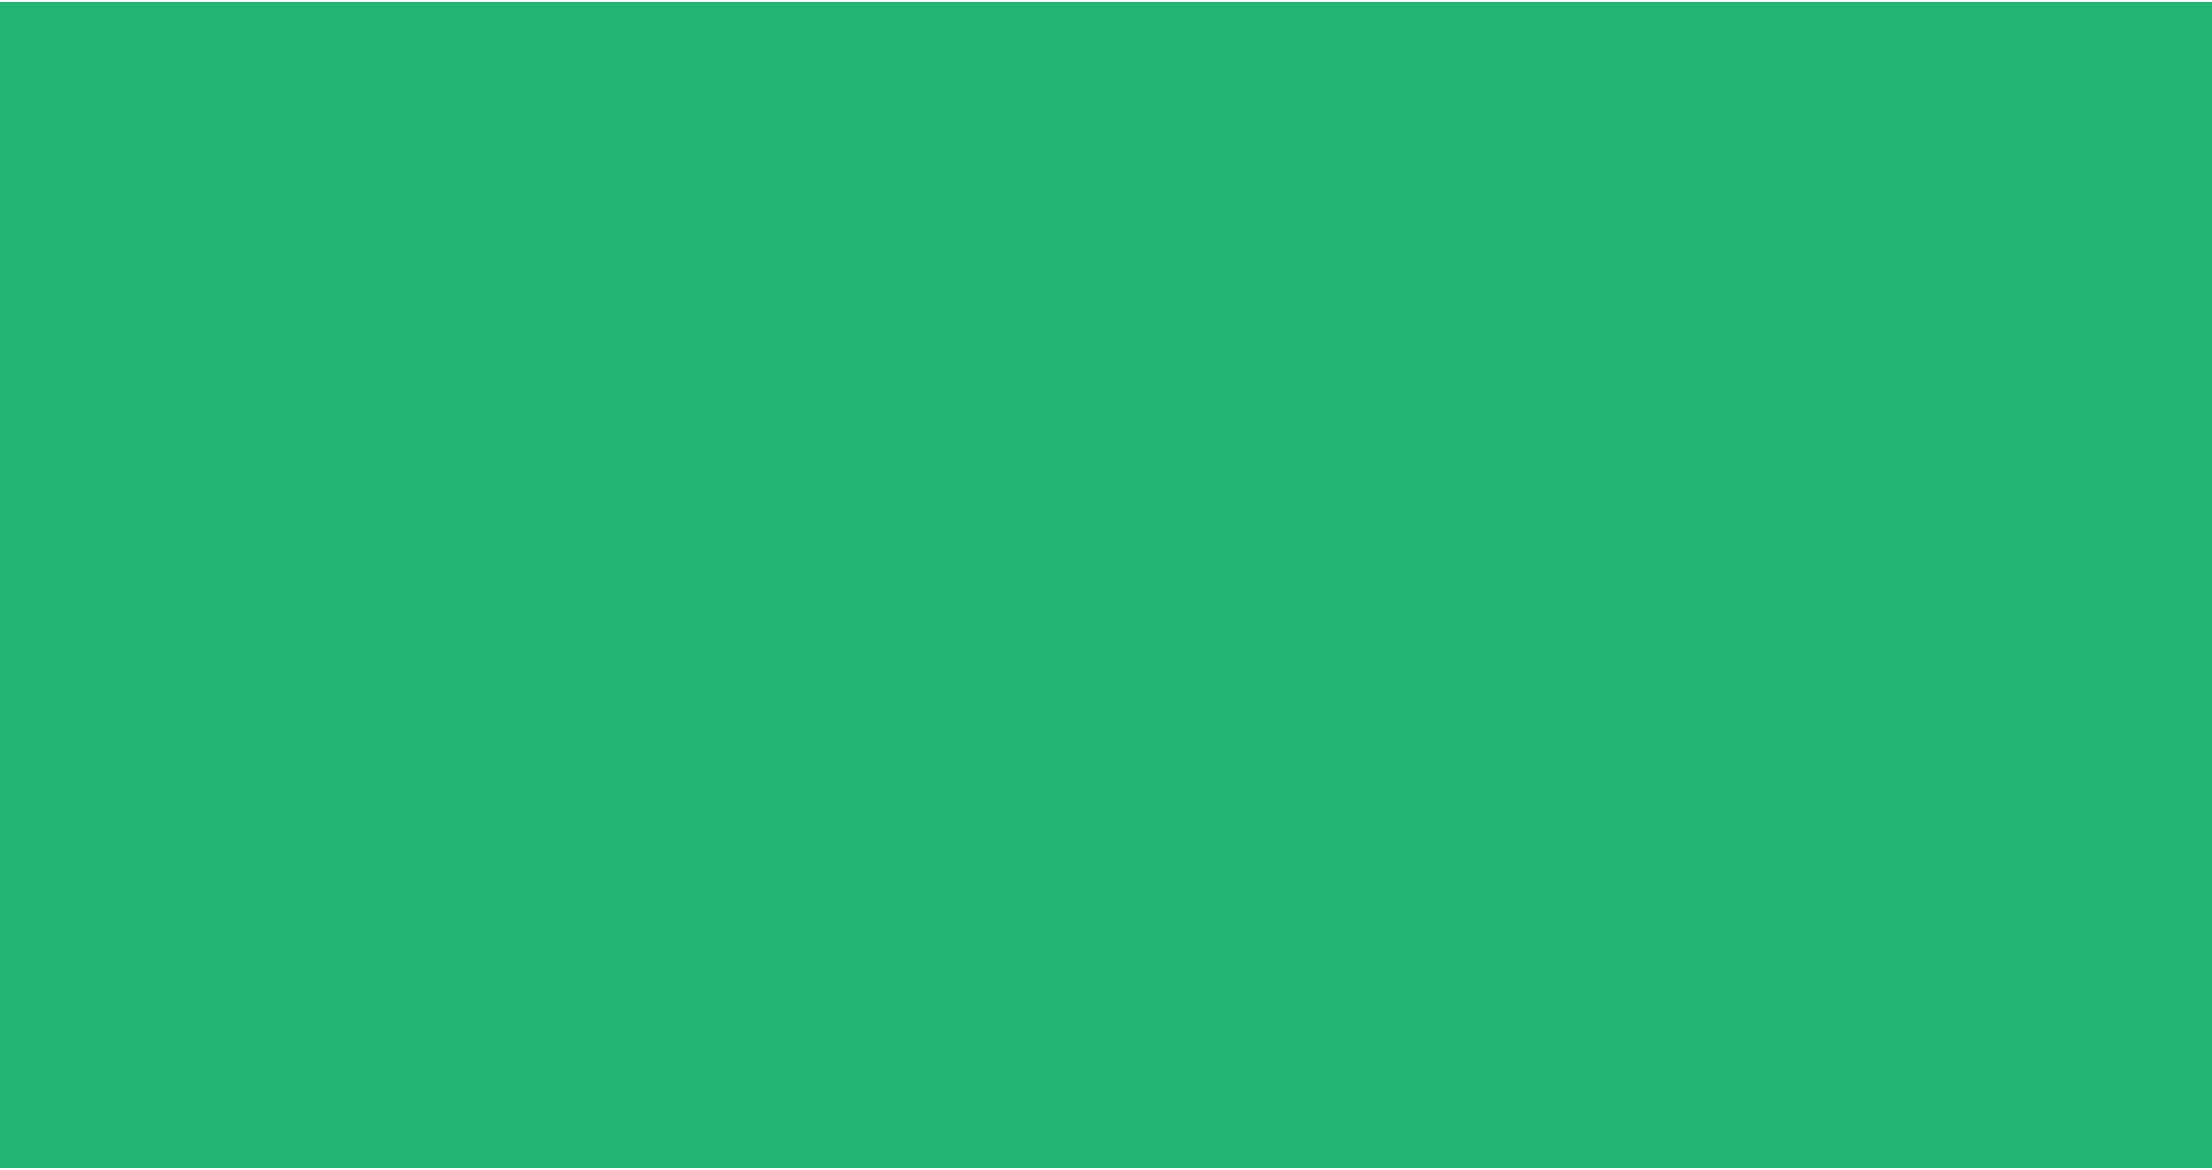

Wakey wakey is a concept app for a personalisable alarm clock. As a user you choose what you want to hear before you’re being awaked, when you have to wake up, and when you really got out of bed.

STENO REGULAR

Steno is an alternative writing method made for faster notation of spoken word. It’s based on sounds, translated to basic forms. Steno regular is digital font that represents the basic rules of the steno writing method. Key in the design of the font is uniformisation and readability.

BOOK SERIES

Design for a series of books with folk tales. I designed the inside of one book and 5 covers. The idea of the series is that every book has the same looking cover, size and typography, but his own color in the inside and on the backcover.
